

Improve calf survival rates by administering Guardian® vaccine to pregnant cows and heifers to transfer scours immunity to their calves via colostrum.* GUARDIAN is the only bovine scours vaccine manufactured with subunit technology in the K99 *E. coli* fraction for precise immune response and low reactivity.

BEST SPECTRUM OF PROTECTION. GUARDIAN protects against more relevant pathogenic causes of scours – including coronavirus Type 3 and *Clostridium perfringens* Types B and D – than Scour Bos® 9 or ScourGuard® 4KC.

BEST MANUFACTURING TECHNOLOGY. GUARDIAN vaccine's subunit *E. coli* technology produces highly purified pilus antigens and makes it less likely than Scour Bos 9 and ScourGuard 4KC to cause systemic reactions.

BEST VACCINATION PROTOCOL. GUARDIAN is the only scours vaccine that features tissue-friendly SQ administration in compliance with BQA guidelines. Plus, its convenient dosing schedule means greater safety for the cow and greater flexibility for you.

See your veterinarian or animal health supplier for GUARDIAN scours vaccine.
